

Valencia Vincent Dmello

valvdemllo17@gmail.com | [GitHub](#) | [LinkedIn](#)

Summary

Data Science graduate with expertise in machine learning, statistical modeling, and data analytics. Proficient in Python, SQL, exploratory analysis and data visualization tools, with experience building predictive models, recommendation systems, and business-focused analytics solutions.

Education

- Masters in Engineering Science (Data Science) - SUNY University at Buffalo, NY *May 2025*
- Bachelor of Science (Mathematics) - St. Xavier's College, India *April 2023*

Experience

Data Analyst (Part-time) - *Community Dreams Foundation* *September 2025 - Present*

- Supported analytics for a landscaping platform by tracking tasks across 4 phases from website analytics to customer retention, helping organize insights over a 3.5-month project timeline.
- Developed interactive Power BI dashboards for real-time financial reporting, including sales/revenue tracking, budget vs. actual analysis, trends, what-if scenario modeling, and filters by department, time period, and category.
- Analyze community program data, create dashboards, and deliver insights to support outreach initiatives.

Data & Operations Intern - *Sakhya Women's NGO* *January 2023 - October 2023*

- Maintained program, donor, and inventory records through accurate data entry, spreadsheet updates, and routine data checks.
- Organized inventory logs in Microsoft Excel, tracked item availability, and supported documentation for resource distribution.
- Cleaned and formatted spreadsheets to improve record accuracy and prepare basic summaries for internal reporting.

Projects

Fake News Detection *February 2025 - May 2025*

- Conducted hypothesis-driven text analysis with Logistic Regression, SVM, LSTM, and BERT (~84% accuracy).
- Deployed interactive app allowing users to test behavior-driven classification in real time.

AI in Fashion *January 2025 - April 2025*

- Built a CNN-based image classification model (94% accuracy) and embedding powered recommendation system for personalized fashion insights.
- Deployed interactive applications with Streamlit, integrating computer vision and recommendation algorithms.

Customer Churn Management *September 2024 - November 2024*

- Conducted SQL analysis revealing lowest churn segment (9.99%) and highest revenue plan.
- Built a real-time Streamlit dashboard to improve accessibility of customer data.

Data Scientist Salary Trends *March 2024 - May 2024*

- Used MLFlow for model tracking, achieving 25% improvement in performance monitoring.
- Identified 20% salary growth trend over 4 years with key influencing factors.

Navigating Medicare *February 2024 - April 2024*

- Processed 1M+ entries, reducing errors by 95% through data preprocessing.
- Developed predictive models with 92% accuracy to forecast beneficiary choices.

Certifications

Google Data Analytics Professional Certificate | Python for Data Science, AI & Development (IBM) | Data Analytics and Visualization Virtual Experience (Accenture)

Key Skills

Python | R | SQL | Java | Pandas | NumPy | Scikit-learn | TensorFlow | Hadoop | Excel | Documentation | Statistical Analysis | Regression | Classification | Forecasting | Predictive Modeling | Matplotlib | ggplot | Tableau | Detail-oriented | Teamwork | Organized | Adaptability | Critical thinking | Punctual | Lifelong learner
